Kim Ta (Scrum and Backend)	Managed the product backlog, wrote new user stories and acceptance criteria, led the planning process and wrote the Sprint Planning documents, led Sprint Retro discussions and documented them, recorded meeting minutes, monitored the Sprint Burndown and created the chart, calculated velocity across sprints, created the base for ordermicroservices, implemented back-end for password reset and uploading cover and contents images, deployed the app onto AWS.
Declan Baker (Frontend and Backend)	Lead the development of the frontend and the backend, implementing the majority of user stories for sprints 3 and 4. Handled the organisation of our databases (MYSQL) and hosting while developing (heroku).
Megan Dalton (Testing and Scrum)	Managed the JIRA product backlog across the sprints, Set up CircleCi and config file for testing and build. Implemented basic Jest testing across the frontend framework. Documentation of testing files and artifacts.
Dineth Abeysinghe (Testing and Frontend)	Worked a on frontend. Worked on implementing the front end for user stories: <ul style="list-style-type: none">- Users can preview book cover- Users can preview a book's table of contents- Users can reset their account password- Admin can download CSV report about BOOKS- Admin can download USERS- Admin can download ORDERS- Shop Owners can see transaction history- Public Users can see transaction history
