Story #1:	Admin downloads CSV report about book transactions	Priority	M
		Effort	5
As a	Admin		
I want	to download csv reports about book transactions		
So that	I can view all the transaction data of a book		

Acceptance criteria	**Criterion 1:**
	    Given that I am logged into my admin account
	        and I am on the settings page
	    When I click the download button for book transactions report
	    Then a CSV file begins to download from the app
	        And the downloaded file can be found in my downloads directory.
	
	Criterion 2:
	    Given that I had downloaded a csv report for book transactions
	    When I locate the downloaded report on my device
	        and I open it
	    Then I can see a CSV report of all book transactions.		

Story #2 :	Admin downloads CSV report about user transactions	Priority	M
		Effort	5
As a	Admin		
I want	to download csv reports about user transactions		
So that	I can view all the transaction data from a user		

Acceptance criteria	**Criterion 1:**
	    Given that I am logged into my admin account
	        and I am on the settings page
	    When I click the download button for user transactions report
	    Then a CSV file begins to download from the app
	        And the downloaded file can be found in my downloads directory.
	
	Criterion 2:
	    Given that I had downloaded a csv report for user transactions
	    When I locate the downloaded report on my device
	        and I open it
	    Then I can see a CSV report of all user transactions.		

Story #3 :	User previews a book cover	Priority	M
		Effort	2

As a	User
I want	to preview a cover for a book
So that	I can find out what the book looks like

| Acceptance criteria | **Criterion 1:**
    Given that the search bar is in the heading of the page
        and I want to search for an existing book in the database
    When I search the book I want to view
        and the book appears in the search results
    Then I can see a preview of the cover in the thumbnail.

Criterion 2:
    Given that the search bar is in the heading of the page
        and I want to search for an existing book in the database
    When I search the book I want to view
        and the book appears in the search results
        and I click on that search result
    Then I am taken to the page where that book is being sold
        and I can see a preview of the cover on that page. |

Story #4:	User previews book table of contents	Priority	M
		Effort	2

As a	User
I want	to preview a table of contents of a book
So that	I can find out the different sections/chapters of a book

| Acceptance criteria | **Criterion 1:**
    Given that the search bar is in the heading of the page
        and I want to search for an existing book in the database
    When I search the book I want to view
        and the book appears in the search results
        and I click on that search result
    Then I am taken to the page where that book is being sold
        and I can see a preview of the table of contents on that page in the details. |

Story #5 :	Visitor searches for books by name	Priority	L
		Effort	3

As a	Visitor
I want	to search for a book name
So that	I can check if there is a book with a particular name being sold on the app

Acceptance criteria	**Criterion 1:**
	    Given that the search bar is in the heading of the page
	        and I want to search for an existing book listed on the app
	    When I search the name of the book
	    Then I am taken to a page with the search results
	        and I can see the book in the search results.
	
	Criterion 2:
	    Given that the search bar is in the heading of the page
	        and I want to search for a word contained in some existing books listed on the app
	    When I search the word
	    Then I am taken to a page with the search results
	        and I can see some books containing the word in their titles in the search results.
	
	Criterion 3:
	    Given that the search bar is in the heading of the page
	        and I want to search for a group of words contained in some existing books listed on the app
	    When I search the words
	    Then I am taken to a page with the search results
	        and I can see some books containing the words in their titles in the search results.

Story #6:	Visitor searches for books by author	Priority	L
		Effort	3

As a	Visitor
I want	search for books by an author name
So that	I can check if the website has books written by a particular author

Acceptance criteria	**Criterion 1:**
	    Given that the search bar is in the heading of the page
	        and I want to search for the full name of an author with listed books on the app
	    When I search the full name of the author
	    Then I am taken to a page with the search results
	        and all the books in the database written by authors with a matching full name are in the search results.
	
	Criterion 2:
	    Given that the search bar is in the heading of the page
	        and I want to search for a single name belonging to authors with listed books on the app
	    When I search the name
	    Then I am taken to a page with the search results
	        and all the listed books written by an author with a matching firstname/surname to the searched name are in the search results.
	
	Criterion 3:
	    Given that the search bar is in the heading of the page
	        and I want to search for a single name
	        and that name is not the first name of any author on the app
	        and that name is not the surname of any author on the app
	    When I search the name
	    Then I am taken to a page with the search results
	        and there are no books in the search results
	        and there is a message telling me that the books cannot be found.

Story #7:	Visitor searches for books by ISBN	Priority	L
		Effort	3

As a	Visitor
I want	search for books by an ISBN
So that	I can check if the website has a specific book

Acceptance criteria	**Criterion 1:**
	    Given that the search bar is in the heading of the page
	       and I want to search for an existing book in the database
	    When I search the ISBN of the book
	    Then I am taken to a page with the search results
	       and I can see the book in the search results.

Story #8:	Visitor searches for books by category	Priority	L
		Effort	3

As a	Visitor
I want	search for books by a category
So that	I can check if the website has books belonging to a particular category

Acceptance criteria	**Criterion 1:**
	    Given that there is a search bar in the heading of the page
	       and the category I want to search is among the ones available in the database
	    When I search for a book category
	    Then I am taken to a page showing the search results
	       and I can see the thumbnail and details of each book attributed with that searched category in the search results.
	
	Criterion 2:
	    Given that I can see the dropdown menu in the header
	    When I click the dropdown menu
	       and I click the categories option
	    Then I am taken to a page with button links to the available categories in the database.
	
	Criterion 3:
	    Given that I am on the categories page
	    When I click on a category
	    Then I am taken to a page with a list of books listed under the desired category.

Story #9 :	Admin logs in	Priority	VH
		Effort	1

As a	Admin
I want	to log in to the system
So that	I can access the system and its features

Acceptance criteria	**Criterion 1:**
	    Given that I am not logged into an account
	        and I am on the homepage
	    When I click on the sign-in button on the homepage
	        and I enter my admin username and password
	        and I press the 'sign-in' button below the credential fields
	    Then I am taken back to the homepage as a logged in admin user.
	
	Criterion 2:
	    Given that I am not logged into an account
	        and I see the dropdown menu in the header of the page
	    When I click on the dropdown menu
	        and I click on the 'sign-in' link from that menu
	    Then I am taken to a login page.
	
	Criterion 3:
	    Given that I am not logged into an account
	        and I have my admin username and password
	        and I am on the login page
	    When I enter my admin username and password
	        and I press the 'sign-in' button below the credential fields
	    Then I am logged into my admin account on the app
	        and I am taken back to the homepage.

Story #10:	Admin adds new users	Priority	M
		Effort	1

As a	Admin
I want	to add a new admin user account
So that	a different admin can sign into a different account

Acceptance criteria	**Criterion 1:**
	    Given that I am logged into my admin account
	        and I am on the user list page
	        and the admin user I want to add has a username that does not belong to any users yet
	    When I click on the 'add user' button
	        and I am taken to a page to enter credentials for a new user
	        and I enter all details of the new user
	        and I press the 'add user' button below the credential fields
	    Then and the new user account now exists in the database
	        and I can see the new user on the user list page.
	
	Criterion 2:
	    Given that I am logged into my admin account
	        and I am on the user list page
	        and the admin user I want to add has an email that already belongs to another user
	    When I click on the 'add user' button
	        and I am taken to a page to enter credentials for a new user
	        and I enter the credentials of the new user
	        and I press the 'add user' button below the credential fields
	    Then I get an error message that the email has already been taken.
	
	Criterion 3:
	    Given that I am logged into my admin account
	        and I am on the page to enter credentials of a new user to add
	    When I leave some fields blank
	        and I press the 'add user' button below the credential fields
	    Then I get an error message that some fields are blank.

Story #11 :	Admin approves/declines shop owner requests	Priority	M
		Effort	1

As a	Admin
I want	to approve/decline public users requests to become shop owners
So that	I can assess the legitimacy of the businesses of public users who want to become shop owners
Acceptance criteria	**Criterion 1:** **Given** that I am logged into my admin account and I am on the inbox page and I can see a log of all users existing in the database and there is a public user waiting for approval to become shop owners and that user provided legitimate business details **When** I click on the yes button next to that public user in the log **Then** the user disappears from the log and the approved account is now a shop owner type. **Criterion 2:** **Given** that I am logged into my admin account and I am on the inbox page and I can see a log of all users existing in the database and there is a public user waiting for approval to become shop owners and that user did not provide legitimate business details **When** I click on the no button next to that public user in the log **Then** the user disappears from the log and the declined account remains as a public user.

Story #12 :	Admin blocks new users	Priority	M
		Effort	1

As a	Admin
I want	Block new users
So that	I can prevent inappropriate users from account access
Acceptance criteria	**Criterion 1:** **Given** that I am logged into my admin account and I see the dropdown menu in the header **When** I click on the dropdown menu and I select the blacklist tab **Then** I am taken to the blacklist page and I can see all the users having been blacklisted. **Criterion 2:** **Given** that I am logged into my admin account and I see the dropdown menu in the header **When** I click on the dropdown menu and I select the user list tab **Then** I am taken to the user list page and I can search for a user who has not yet been blocked. **Criterion 3:** **Given** that I am logged into my admin account and I am on the user list page **When** I click on the search bar and I enter the username of a user I want to block and the username belongs to a registered user **Then** the user appears in the search results and there is a button to block the user next to the user in the search results. **Criterion 4:** **Given** that I am logged into my admin account and I am on the user list page and I the user I want to block is in the search results **When** I click on the 'block' button next to that user in the search results **Then** the user can now be found in the blacklist and the block user now cannot access their account.

Story #13:	Admin edits new users	Priority	M
		Effort	1

As a	Admin
I want	to edit the details of a new user account
So that	I can have new details updated for a new user account

Acceptance criteria	**Criterion 1:**
	    Given that I am logged into my admin account
	        and I am on the user list page
	        and there are users in the database
	        and I can see a log of all users existing in the database
	    When I click on the 'edit' button next to a user in the log
	        and I am taken to a page with fields for all user details
	        and I enter new details for that account
	        and I click 'edit' below all the fields
	    Then I am taken back to the user list page
	        and the user now has new details on their account.

Story #14 :	Admin edits books	Priority	M
		Effort	1

As a	Admin
I want	edit books inside the system
So that	I can update details for books if any should change

Acceptance criteria	**Criterion 1:**
	    Given that I am logged into my admin account
	        and I can see the search bar in the header
	    When I search for a book in the database
	        and I select a search result
	    Then I am taken to the edit book page
	        and I see the edit book button.
	
	Criterion 2:
	    Given that I am logged into my admin account
	        and I am on a book page
	    When I click on the edit book button
	    Then I am taken to a page with fields to edit the details of the book
	        and I see an option to upload a new cover image.
	
	Criterion 3:
	    Given that I am logged into my admin account
	        and I am on the edit book page
	    When I enter new details for the book
	        and I upload a new image for the book cover
	        and I click update book
	    Then the book now has a new cover for its thumbnail
	        and the book now has a new cover for its page
	        and the details of the book are updated.

Story #15:	Admin adds books	**Priority**	M
		Effort	1

As a	Admin
I want	to add books to the app
So that	the app has new books online for users to view

Acceptance criteria	**Criterion 1:**
	    Given that I am logged into my admin account
	        and I see the dropdown menu in the header
	    When I click on the dropdown menu
	        and I select the add book link
	    Then I am taken to a page to add a book with fields for all book details
	        and that page also has a button to upload an image.
	
	Criterion 2:
	    Given that I am logged into my admin account
	        and that I am on the page to fill in the details of a new book to add
	    When I enter all the detail fields for the new book
	        and I upload a new image for the book
	        and I click add book below the fields
	    Then I am redirected to the page for the new book.
	
	Criterion 3:
	    Given that I am logged into my admin account
	        and that I am on the page to fill in the details of a new book to add
	    When I leave some book detail fields blank
	        and I click 'add book' below the fields
	    Then I get an error message on the page that some fields are blank.
	
	Criterion 4:
	    Given that I am logged into my admin account
	        and that I am on the page to fill in the details of a new book to add
	    When I do not upload a book cover
	        and I click 'add book' below the fields
	    Then I get an error message on the page that I have not uploaded a book cover.

Story #16 :	Admin views summary of transactions	**Priority**	L
		Effort	3

As a	Admin
I want	to view a summary of transactions
So that	I can keep track of all past and current transactions made/being made

Acceptance criteria	**Criterion 1:**
	    Given that I am logged into my admin account
	        and I see the dropdown menu in the header
	    When I click on the dropdown menu
	         and I select the settings link
	    Then I am taken to the settings page
	        and I see a button to view transaction summary.
	
	Criterion 2:
	    Given that I am logged into my admin account
	         I am on the settings page
	    When I click on the view transactions summary link
	    Then I am taken to a page showing a summary of all transactions
	        and I can see details of all past transactions
	        and I can see details of all current transactions
	        and all transactions are sorted in order by the date they were created.

Story #17 :	Shop owner views their transactions	Priority	L
		Effort	3

As a	Shop Owner
I want	to view my transaction history
So that	I can monitor all the transactions that I have made across the app

Acceptance criteria	**Criterion 1:**
	    Given that I am logged into my shop owner account
	       and there are transactions on my account
	    When I click on the dropdown menu in the header for my account
	       and I click on the link to my 'transaction history'
	    Then I am taken to a page showing a summary of all transactions I have been a part of
	       and I can see details of all my past transactions of books I have sold
	       and I can see details of all my current transactions of books I have sold
	       and all transactions are sorted in order by the date they were created.

Story #18:	Shop owner sees the status of current orders	Priority	L
		Effort	3

As a	Shop owner
I want	to view the status of current orders
So that	I can prepare the orders I receive

Acceptance criteria	**Criterion 1:**
	    Given that I am logged into my shop owner account
	       and there are current orders on my account
	    When I click on the dropdown menu in the header for my account
	       and I click on the link to my 'current orders'
	    Then I am taken to a page showing the status of all my current orders
	       and I can see the status of each of my current orders.
	
	Criterion 2:
	    Given that I am logged into my shop owner account
	       and there are no current orders on my account
	    When I click on the dropdown menu in the header for my account
	       and I click on the link to my 'current orders'
	    Then I am taken to a page showing the status of all my current orders
	       and there are no orders on that page
	       and there is a message that I have no current orders.

Story #19:	Public user sees their transaction history	**Priority**	L
		Effort	3

As a	Public user
I want	to view my own transaction history
So that	I can monitor my book transactions on the app
Acceptance criteria	**Criterion 1:** **Given** that I am logged into my public user account and there are transactions on my account **When** I click on the dropdown menu in the header for my account and I click on the link to my 'transaction history' **Then** I am taken to a page showing a summary of all transactions I have been a part of and I can see details of all my past transactions of books I have bought and I can see details of all my past transactions of books I have sold and I can see details of all my current transactions of books I have bought and I can see details of all my current transactions of books I have sold and all transactions are sorted in order by the date they were created. **Criterion 2:** **Given** that I am logged into my public user account and there are no transactions yet on my account **When** I click on the dropdown menu in the header for my account and I click on the link to my 'transaction history' **Then** I am taken to a page showing a summary of all transactions I have been a part of and there are no transactions logged on that page and I see a message that I have not made any transactions.

Story #20:	Public user sees the status of their orders	**Priority**	L
		Effort	3

As a	Public user
I want	view the status of my orders
So that	I can keep track of when my orders are ready
Acceptance criteria	**Criterion 1:** **Given** that I am logged into my public user account and there are current orders on my account **When** I click on the dropdown menu in the header for my account and I click on the link to my 'current orders' **Then** I am taken to a page showing the status of all my current orders and I can see the status of each of my current orders. **Criterion 2:** **Given** that I am logged into my public user account and there are no current orders on my account **When** I click on the dropdown menu in the header for my account and I click on the link to my 'current orders' **Then** I am taken to a page showing the status of all my current orders and there are no orders on that page and there is a message that I have no current orders.

Story #21:	Public user searches for books by name	Priority	H
		Effort	3
As a	Public user		
I want	to search for a book name on the app		
So that	I can find the book I am interested in purchasing		

Acceptance criteria	**Criterion 1:**
	  Given that I am logged into my public user account
	    and there is a search bar in the heading of the page
	    and the book I want to find exists in the database
	  When I search for a book name
	  Then I am taken to a page showing the search results
	    and I can see the thumbnail of the book and its details in the search results.
	
	Criterion 2:
	  Given that I am logged into my public user account
	    and I am on the search results page
	    and the book name I searched had a book I was interested in on the results
	  When I click on the book listing
	  Then I am taken to the page of the listed book
	    and I see a button for paying for the book.
	
	Criterion 3:
	  Given I am logged into my public user account
	    and that the search bar is in the heading of the page
	    and I want to search for a book that has not been listed on the app
	  When I search the name of the book
	  Then I am taken to a page with the search results
	    and there are no books in the search results
	    and there is a message telling me that books cannot be found.
	
	Criterion 4:
	  Given I am logged into my public user account
	    and that the search bar is in the heading of the page
	    and I want to search for a word contained in some existing books listed on the app
	  When I search the word
	  Then I am taken to a page with the search results
	    and I can see some books containing the word in their titles in the search results.		

	Criterion 5:
	  Given I am logged into my public user account
	    and that the search bar is in the heading of the page
	    and I want to search for a group of words contained in some existing books listed on the app
	  When I search the words
	  Then I am taken to a page with the search results
	    and I can see some books containing the words in their titles in the search results.

Story #22 :	Public user searches for books by author	Priority	H
		Effort	3

As a	Public user
I want	to search for a book by author on the app
So that	I can discover books of a particular author

Acceptance criteria	

Criterion 1:
    Given that I am logged into my public user account
      and there is a search bar in the heading of the page
      and the author I want to search is associated with some existing books in the database
    When I search for an author name
    Then I am taken to a page showing the search results
      and I can see the thumbnail and details of all the books written by the author in the search results.

Criterion 2:
    Given that I am logged into my public user account
      and that I am on the search results page
      and the author first/last/full name I searched had a book I was interested in on the results
    When I click on the book listing
    Then I am taken to the page of the listed book
      and I see a button for paying for the book.

Criterion 3:
    Given that I am logged into my public user account
      and that the search bar is in the heading of the page
      and I want to search for an author who does not have listed books on the app
    When I search the name of the author
    Then I am taken to a page with the search results
      and there are no books in the search results
    and there is a message telling me that the books cannot be found.

Criterion 4:
    Given that I am logged into my public user account
      and that the search bar is in the heading of the page
      and I want to search for a single name belonging to authors with listed books on the app

    When I search the name
    Then I am taken to a page with the search results
      and all the listed books written by an author with a matching firstname/surname to the searched name are in the search results.

Criterion 5:
    Given that I am logged into my public user account
      and that the search bar is in the heading of the page
      and I want to search for a single name
      and that name is not the first name of any author on the app
      and that name is not the surname of any author on the app
    When I search the name
    Then I am taken to a page with the search results
      and there are no books in the search results
      and there is a message telling me that the books cannot be found.

Story #23:	Public user searches for books by ISBN	**Priority**	H
		Effort	3

As a	Public user
I want	to search a book ISBN on the app
So that	I can find the particular book I am interested in purchasing

Acceptance criteria	**Criterion 1:**
	    Given that I am logged into my public user account
	        and there is a search bar in the heading of the page
	        and the book I want to find exists in the database
	    When I search for a book ISBN
	    Then I am taken to a page showing the search results
	        and I can see the thumbnail of the book and its details in the search results.
	
	Criterion 2:
	    Given that I am logged into my public user account
	        and that I am on the search results page
	        and the ISBN I searched had a book I was interested in on the results
	    When I click on the book listing
	    Then I am taken to the page of the listed book
	        and I see a button for paying for the book.

Story #24:	Public user searches for books by category	**Priority**	H
		Effort	3

As a	Public user
I want	to search a category of books on the app
So that	I can find books that belong to a particular category

Acceptance criteria	**Criterion 1:**
	    Given that I am logged into my public user account
	        and there is a search bar in the heading of the page
	        and the category I want to search is among the ones available in the database
	    When I search for a book category
	    Then I am taken to a page showing the search results
	        and I can see the thumbnail and details of each book attributed with that searched category in the search results.
	
	Criterion 2:
	    Given that I am logged into my public user account
	        and that I am on the search results page
	        and the category I searched had a book I was interested in on the results
	    When I click on the book listing
	    Then I am taken to the page of the listed book
	        and I see a button for paying for the book.

Story #25:	Public user receives the fee using PayPal	Priority	L
		Effort	8

As a	Public user
I want	pay the fee for transactions using PayPal
So that	I can pay for order using a secure service
